ECOLOGY OF TEMPORARY POOLS

Guest Editors: L. Blaustein and S.S. Schwartz

Foreword by the Guest Editors		i
Why study ecology in temporary pools?	<i>L. Blaustein and S.S. Schwartz</i>	303
Distributions of pond-breeding anurans: An overview of mechanisms	<i>D.K. Skelly</i>	313
Influence of abiotic and biotic factors on amphibians in ephemeral ponds with special reference to long-toed salamanders (<i>Ambystoma macrodactylum</i>)	<i>A.R. Blaustein, E.L. Wildy, L.K. Belden, and A. Hatch</i>	333
Ecological correlates of anuran species richness in temporary pools: A field study in South Carolina, USA	<i>G.W. Eason, Jr. and J.E. Fauth</i>	347
Dispersal of invertebrates among temporary ponds: Are genetic estimates accurate?	<i>A.J. Bohonak and G.K. Roderick</i>	367
Habitat ephemerality and hatching fractions of a diapausing anostracan (Crustacea: Branchiopoda)	<i>T.E. Philippi, M.A. Simovich, E.T. Bauder, and J.A. Moorad</i>	387
Hatching responses of temporary pool invertebrates to signals of environmental quality	<i>M. Spencer and L. Blaustein</i>	397
Predator-induced morphological and behavioral changes in a temporary pool vertebrate	<i>R. Trembath and B.R. Anholt</i>	419
Boom-or-bust development of a predatory mosquito in the temporary aquatic habitats of Florida, USA	<i>L.P. Lounibos</i>	433
Modeling the incidence of temporary pond microcrustacea: The importance of dry phase and linkage between ponds	<i>M.J. Jeffries</i>	445
Habitat size and isolation affect colonization of seasonal wetlands by predatory aquatic insects	<i>C. Wilcox</i>	459
Desiccation frequency reduces species diversity and predictability of community structure in coastal rock pools	<i>T.W. Therriault and J. Kolasa</i>	477
Effects of <i>Triops newberryi</i> (Notostraca: Triopsidae) on aquatic insect communities in ponds in the Colorado Desert of Southern California	<i>W.E. Walton</i>	491
Rice fields as temporary wetlands: A review	<i>S.P. Lawler</i>	513
Guidelines for Contributors		529
